Index to Volume 22

AAN DE KERK, A. L.: Nikon retinal camera, Retinapan 45, 136
Aerial photography, analysis of coastal vegetation through, 182
Agfacontour films, 260
AGNELLO, S.: Obituary of Joseph Eldridge Markee, scientist, medical educator, and bio-communicator, 46
Ampex audio-tape duplicator, 141
Anatomy, surface, video tapes on, 216
Anthropometric stereo-photogrammetry, 64
Archaeological documentation, Kodak high-speed infra-red film, serial no. 4143 for, 39
Armstrong, James (1911–1971) a master of neuro-histological technique, 133
ASHCROFT, G., ROTHWELL, P. S., and EDWARDS, G. A.: A visual aid for the treatment of temporomandibular joint dysfunction, 213
Association of Medical Illustrators, 28th Annual Meeting, 1973, 270
Audio Learning Limited, taped discussions on biology, 72
  matching unit modification, 141
  -tapes from Department of Audio Visual Communication of BMA, 72
    duplicator, Ampex, 141
    as individual learning materials, 72
    recorders for beginners, part 1, 11; part 2, 97
    recordings, preparing for individual study, notes on acceptability of different speakers, 13
  visual equipment, projector/tape-recorder, for teaching pathological anatomy, 167
  techniques, use for involvement-learning, 94

Background, shadowless white, for clinical photography, 55
Battery tester model BT.15 (Eagle), 201
Beaulieu R16 for endoscopic cinephotography, 57
BERESFORD, W. A.: Transfer numerals and arrows on 25 mm slides, 260
Biocommunications '73, (28th Ann. Meet. Association of Medical Illustrators, 43rd Ann. Meet. Biological Photographic Association, Inc, 15th Ann. Meet., Health Sciences Communications Association) Richmond, Va, USA, 1973, 270
Biological Photographic Association, Inc, 43rd Annual Meeting, 1973, 270
Biology, taped discussions, Audio Learning Limited, 72
Blind people's aid, tactile visual-substitution system, 67

Dental visual aids, multiple-view photographs, 61 (43/22)
Diabetic retinopathy, fluorescent photography in diagnosis and treatment, 263 (69/22)
Diagnosis, medical, as a cognitive skill, computer assisted study, 143 (57/22)
Directory for professional organisations, 142 (45/22)
Discharge lamps and colour television, 60 (24/22)
Doctors as decision-makers, computer-assisted study of diagnosis as a cognitive skill, 143 (57/22)
  and medical television, 59 (18/22)
Dorsal region, upper, automography, 58 (11/22)
Duplication, thermal contact, of videotape, 58 (3/22)

Education, biomedical communications, courses, 265 (96/22)
  'On being a good professor', 265 (98/22)
  medical, motion pictures in, 265 (102/22)
  sense and nonsense, 265 (100/22)
  and motion pictures in France, 59 (21/22)
  photographic, survey of centres, 265 (94/22)
  three method of instruction, comparison, 265 (99/22)
Electron microscope, scanning-transmission, comparison with conventional, 264 (89/22)
  scanning transmission, and stereomicrography, 264 (90/22)
Electronic video recording, colour, assessing, 264 (81/22)
Engineering, holographic methods of visualization and measurement, 58 (1/22)
Enlarger control, automatic, integrating exposure meter for, 142 (47/22)
Examinations, appraisal of student performance, 143 (58/22)
Exposure control, automatic, 60 (31/22)
  meter, integrating, for automatic enlarger control 142 (47/22)

Farnell Tanberg sound system, suggested operating techniques, 60 (30/22)
Fellowship in medical photography, guidance for would-be applicants, 142 (46/22)
Fibre tip pens, tests for, 60 (27/22)
Film, Polaroid coaterless, structure and image formation system, 61 (40/22)
  strip projectors, 142 (52/22)
  Super 8, review of potentialities, 58 (6/22)
Flash meters, review of three, 60 (29/22)
Fluorescein test and thermography, comparison between in detection of incompetent perforating veins, 142 (54/22)
Fluorescence microscopy in botanical research, 58 (9/22)
Fluorescent photography in diagnosis and treatment of diabetic retinopathy, 263 (69/22)
France, motion pictures and education, 59 (21/22)
Fundus photography on Polaroid film, 61 (42/22)

Gastrocamera, method for in vivo roentgenologic-pathologic correlation, 263 (68/22)
General practitioners and medical television, 59 (18/22)

Holographic interference microscope, application, 143 (61/22)
  microscopy, three methods, 58 (8/22)
  methods of visualization and measurement of engineering, 58 (1/22)

Illustration, medical, historical survey, 263 (73/22)
  in NHS, 263 (72/22)
Image illumination and depth, 60 (36/22)
Infrared and colour photography for soil measurement, 263 (70/22)
  thermography applied to skin, 142 (53/22)
Instatech cameras, prism viewfinding for, 142 (49/22)

Laser light, coherent monochromatic, photography with, 61 (41/22)
Lay-out form, television chart, 264 (85/22)
Learning, from prose, effects of three types of inserted questions, 265 (101/22)
  by tape/slide, linear programme, and illustrated booklet: comparative study, 265 (99/22)
Lens attachments, use and abuse, 61 (39/22)
  optical, aberration-free, focus with neutrons, 266 (106/22)
  Zeiss macro, for cinemacrography 1 : 1 to 18 : 1, 58 (4/22)
Linear tomography, examination of blur, 264 (91/22)

Measurements, automated, of photographs and radiographs, 265 (92/22)
  evolution of transfer function, 265 (104/22)
  of objects in open sea, use of photography, 265 (103/22)
Medical education, continuing, planning for evaluation, 143 (55/22)
  illustration, historical survey, 263 (73/22)
  in NHS, 263 (72/22)
  photography, fellowship, guidance for would-be applicants, 142 (46/22)
Microfiche, colour, for teaching anatomic pathology, 59 (20/22)
Microfilm techniques, applications, systems, 60 (32/22)
Microphone, improving quality of recording, 264 (86/22)
Microscopes, historical review, 142 (51/22)
  holographic interference, application, 143 (61/22)
  scanning electron, 'charging' effects, 58 (7/22)
Microscopy, fluorescence, in botanical research, 58 (9/22)
  holographic, three methods, 58 (8/22)
Microsurgery, low cost television adaptation for 60 (23/22)
Microtubules, wall, in pollen grains, 58 (10/22)
Motion pictures and education in France, 59 (21/22)
  in medical education, 265 (102/22)
Multiple choice questions, appraisal, 143 (58, 59, 60/22)
Multiple-view photographs for dental visual aids, 61 (43/22)

National Health Service, and medical illustration, 263 (72/22)
Negatives, duplicating, guide to principles, 61 (38/22)
  miniature, badly scratched, elimination, 60 (35/22)
Nurses, Ph.D. courses for nurses in USA, 265 (97/22)

Ophthalmology, instrument construction and development, 142 (50/22)
Optical fibre, soft-centred, loses less light, 265 (105/22)
Oral diagnosis, use of ultraviolet autofluorescence, 142 (44/22)
  pathology, factor analysis of objective tests in, 143 (56/22)
Organizations, professional, directory, 142 (45/22)

Pathology, anatomic, colour microfiche for teaching, 59 (20/22)
Patients, photography of, 263 (66/22)
Pens, fibre tip, testing, 60 (27/22)
Pharmacology, multiple choice examination questions, 143 (59/22)
Ph.D. courses for nurses in USA, 265 (97/22)
Photoconductive TV camera tubes, survey, 59 (22/22)
Photography, autostereoscopic, new development, 263 (67/22)
  colour, cotton leaves and soil salinity, 263 (71/22)
  education, survey of centres, 265 (95/22)
  fluorescent, in diagnosis and treatment of diabetic retinopathy, 263 (69/22)
  of patients, part V, 263 (66/22)

Photographs, automated measurements, 265 (92/22)
Pictures, scientific, scales, 263 (65/22)
Plutonium, intracellular, high resolution autoradiography, 143 (64/22)
Polaroid coaterless film, structure and image formation system, 61 (40/22)
film, fundus photography on, 61 (42/22)
radiography, value, reappraisal, 143 (63/22)
Pollen grains, wall microtubules in, 58 (10/22)
Positives, direct, photographic response, 263 (75/22)
Preclinical medicine, advantages and disadvantages of closed-circuit TV in large classes, 59 (13/22)
Prints, proportioning for publication, part I, 263 (74/22)
Prism viewfinding for Instatech cameras, 142 (49/22)
Projection with automatic cartridge change, 60 (26/22)
Projectors, film-strip, 142 (52/22)
slide, testing performance, 264 (80/22)

Radiographs, automated measurements, 265 (92/22)
Radiography, Polaroid, value, reappraisal, 143 (63/22)
Random selection and branching in the motion picture audio-visual field, 58 (5/22)
Recording, time-lapse, caterpillars, 61 (37/22)
Resolution, number of lines required, 264 (84/22)
Retinopathy, diabetic, fluorescent photography in diagnosis and treatment, 263 (69/22)
Retro-illumination, visibility of transport objects in the eye by, 60 (33/22)
Roentgenography, three-dimensional, 143 (62/22)

Scales, for scientific pictures, 263 (65/22)
Scanning-transmission electron microscope, comparison with conventional, 264 (89/22)
and stereomicrography, 264 (90/22)
Sea, open, measurement of objects by photography, 265 (103/22)
Shake, camera, delay device to reduce, 60 (28/22)
Slides and tapes for teaching, 59 (17/22)
blue, method to standardise, 142 (48/22)
Soils, colour and infrared photos for measuring, 263 (70/22)
salinity, cotton leaves and colour photos, 263 (71/22)
Sound sense, part I. Using the microphone, 264 (86/22)
system, Farnell Tanberg, suggested operating techniques, 60 (30/22)
Stereomicrography, with scanning electron microscope, 264 (90/22)
Student performance, appraisal in examination, 143 (58/22)
Super 8 film, review of potentialities, 58 (6/22)
release prints with optical sound, training programme, 59 (16/22)

Tapes and slides for teaching, 59 (17/22)
video, exchanges, practicalities, 59 (19/22)
Teaching, medical, sense and nonsense, 265 (100/22)
Television, camera, miniature, 264 (88/22)
chart lay-out form, 264 (85/22)
closed-circuit, advantages and disadvantages in large classes in preclinical medicine, 59 (13/22)
colour, and discharge lamps, 60 (24/22)
and viewing conditions, 264 (82/22)
low cost adaptation for microsurgery, 60 (23/22)
medical, and general practitioners, 59 (18/22)
portable colour camera system, 60 (25/22)
Tests, objective, factor analysis, oral pathology, 143 (56/22)
Thermal contact duplication of videotape, 58 (3/22)
Thermography and fluorescein test, comparison between in detection of incompetent perforating veins, 142 (54/22)
infra-red, applied to skin, 142 (53/22)
Tomography, linear, examination of blur, 264 (91/22)
of upper dorsal region, 58 (11/22)
Transfer functions, evolution, 3. Theory of measuring techniques, 265 (104/22)
Transparent objects, visibility in eye by retro-illumination, 60 (33/22)
Tritium, sensitivity of autoradiography using, 59 (12/22)
Tubes, photoconductive TV camera, survey, 59 (22/22)
Twinflash, Bowen's texturelight, 264 (79/22)

Ultraviolet autofluorescence: an aid in oral diagnosis, 142 (44/22)

Veins, incompetent perforating, comparison between thermography and fluorescein test in detection, 142 (54/22)
Video cassette, competition developing between systems, 264 (87/22)
system, philosophy, markets and future, 264 (83/22)
tape exchanges, practicalities, 59 (19/22)
thermal contact duplication, 58 (3/22)
Visual aids, assessing students' perceptions, 59 (15/22)
dental, multiple-view photographs for, 61 (43/22)
guideline for presentations, 59 (14/22)
Voltage controller, 264 (78/22)

Wall microtubules in pollen grains, 58 (10/22)
Wildlife painting booms, 263 (77/22)

Zeiss, macro lens for cinemacrography 1:1 to 18:1, 58 (4/22)

medical and biological illustration

The Journal of the Institute of Medical and Biological Illustration

Volume 22

Editor	T. A. Quilliam (January and April) L. Bowcock (July and October)
Art Editor	Sylvia Treadgold
Press Committee	R. Ollerenshaw (Book Reviews), R. Fletcher (Journal Abstracts), R. Marshall (Equipment and Methods)
Advisory Board	L. H. Beard, L. Bowcock, B. Bracegirdle, P. N. Cardew, P. Cull, C. E. Engel, M. Essex-Lopresti, I. C. Gilliland, D. Hammersley, P. Hansell, R. C. MacKeith, T. A. Quilliam, J. K. Russell, D. Tredinnick Editor, *British Medical Journal*
Overseas Corresponding Members	W. F. Berg (Switzerland), R. Gilder (Canada), Charlotte Holt (USA), Nancy Joy (Canada)

British Medical Association Tavistock Square London WC1H 9JR

No 1 January 1972

page 1 Compatible exchange of pulsed magnetic tapes for automatic projection *Stewart Fletcher*

11 Audio-tape recorders for beginners–Part 1 *Ronnie Morgan*

13 Preparing audio-tape recordings for individual study: Notes on the relative acceptability of different speakers *Richard E. Wakeford*

15 Experience with a telephone lecture network *John R. F. Ingall, Joseph L. Reynolds, and Carolyn S. Plavcan*

22 Editing video-tape recordings–Part 3 *Alan W. Lane*

27 The exchange of video-tape recordings for teaching physiology and pharmacology *G. B. Leslie and D. H. McClelland*

30 *X*-ray film reduction to 100-mm or 35-mm format through a television system *T. H. Hills and J. F. Rytina*

34 Graphic reconstruction for embryology classwork *M. J. T. Fitzgerald and Anne Gillan*

39 Sonic waves and hearing in man *T. A. Quilliam*

46 Joseph Eldridge Markee: Scientist, medical educator, and biocommunicator (obituary) *Sam A. Agnello*

50 'N.K.H.': Pioneer and chronicler of medical photography (obituary) *C. E. Engel*

Equipment and methods

52 Lecterns and their illumination *J. H. Gardiner*

54 Automatic exposure correction for Leitz Reprovit *Richard Morton*

55 Shadowless white background for clinical photography *Richard Siwek*

55 'Lancon' selective image projector

56 Portadesk

56 Portable projection screens

56 A new low-silver content photographic process

56 'Kentint' coloured base bromide paper

57 Beaulieu R16 for endoscopic cinephotography

58 Journal abstracts

62 Book reviews

64 Reports and proceedings

72 Motion pictures and other media

No 2 April 1972

page 74 *Cladosporium resinae* *M. Tatham*

76 The medical artist yesterday, today, and tomorrow *Clifford Shepley*

82 The Pima Indians: a tribe in transition *H. T. Cain*

85 A pictorial archive of a vanishing culture *T. A. Quilliam*

94 Involvement-learning using audio-visual techniques *Una Maclean and Tom Pilkington*

97 Audio-tape recorders for beginners–Part 2 *Ronnie Morgan*

100 Use of table-top projectors for histology classes *Maeve FitzGerald*

103 A method of reconstruction from serial sections *E. W. T. Morris*

106 Television and the scientific investigator *Willard J. Karle*

112 An automatic light dimmer for camera opticals *Ronald McRae*

115 Photography of house dust mites *Douglas Lawson*

119 The yeast cell in anti-mitochondrial activity of drugs *D. Wilkie*

125 Some biological aspects of vibration *T. A. Quilliam*

133 A master of neuro-histological technique (obituary) *J. Z. Young*

Equipment and methods

136 Whole-body photography and modesty *Lynda P. Gale*

136 Nikon retinal camera, Retinapan 45 *A. L. Aan de Kerk*

138 A modification for the Zeiss microflash *Gerald D. Leach*

140 Staged models in embryology *Peter L. Field*

141 Ampex audio-tape duplicator

141 Audio matching unit modification

142 Journal abstracts

144 Reports and proceedings

146 Motion pictures and other media

No 3 July 1972

page 148 Editorial

149 Colour microfiche *Chandler Smith*

150 Functional anatomy of the hand *David A. Griffiths*

154 Macrophotography of the skin *Julie A. Dorrington*

157 Instructional media: production and producer *Robert S. Gilder*

159 A programmed course in histopathology: design and use *H. U. Zollinger*

162 Use and experience with feedback devices in lectures *John Womersley, George Stenhouse, and William R. Dunn*

167 A simple audio-visual device. Its use in undergraduate and postgraduate teaching of pathological anatomy *H. U. Zollinger*

169 A novel plastic brain storage container *C. Romero-Sierra, J. A. Tanner, and A. Travill*

172 Medical libraries and museums: changing institutions *Martin G. Levine*

174 A technique for making flexible casts of brain specimens *Alfred C. Strohlein*

182 The analysis of coastal vegetation through the medium of aerial photography *J. C. E. Hubbard and B. H. Grimes*

191 A simple polarizing spinner for the overhead projector *Ronald K. McRae*

Equipment and methods

194 Direct printing of unstained, water immersed immunodiffusion slides *A. S. Tsotsos, G. Corbitt, and M. Brett*

196 A portable cassette-slide tutor *J. H. Gardiner*

197 An inexpensive time-lapse control unit *Brian Bracegirdle*

200 Television replay systems *John Cooper and Charles E. Engel*

201 Eagle battery tester model BT.15 *Peter Hansell*

202 Gordon Carrel

203 Indoor colour motion pictures without special lighting

204 Super 8 specialist cameras

205 Colour film for photomicrography

206 Book reviews

208 Reports and proceedings

No 4 October 1972

page 210 Editorial

211 Photography of the skull *R. Summers*

213 A visual aid for the treatment of temporomandibular joint dysfunction *G. Ashcroft, P. S. Rothwell, and G. A. Edwards*

216 Video tapes on surface anatomy *Raymond F. Gasser*

220 Cross section of an embryonic eye *Marian A. Hudson*

222 A wedding at Maer *E. Posner*

224 Administration and planning: some factors influencing the choice of instructional medium *Robert S. Gilder*

226 Xenon strobe lighting for flash cine micrography *R. W. Graham*

238 Observation of the capillary structure of the human gingiva *R. M. Callender*

245 Filters for monochrome photomicrography of periodic acid-Schiff stained sections *M. D. McGavin*

252 Close-range photography with the Bowen's 'Texturelight' ringflash *Brian Bracegirdle*

256 A method of reproducing electron diffraction negatives *D. J. Drury*

Equipment and methods

259 Simplified specimen photography *M. H. C. Parsons and R. J. Conibear*

260 Transfer numerals and arrows on 35mm slides *William A. Beresford*

260 'Agfacontour' film

260 S.E. eight-four portable tape recorder

262 Double band 16mm projector

263 Journal abstracts

267 Book reviews

270 Reports and proceedings
